Planet's company history

1945

The **carpenter's shop W. Jaggi and Söhne** in Zurich applies for the first patent for drop-down seals.

1967

Start of the **first professional production line** for Planet drop-down seals.

1972

The **production** of the Planet drop-down seals is sourced out from the carpenter's shop and managed as an **independent business**.

1974

The production operation is transferred from Zurich to **Kloten**.

1986

The new production building in **Nürensdorf** is ready to move into.

1998

The company is sold to Andreas Dintheer and René Gyger and since then managed as **Planet GDZ AG**.

2008

Start of activities in **the new building**, which is built to the standards of the Minergie Association, in **Tagelswangen**.

2016

Opening of the extensive new wing of the factory building.

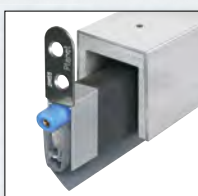

2018

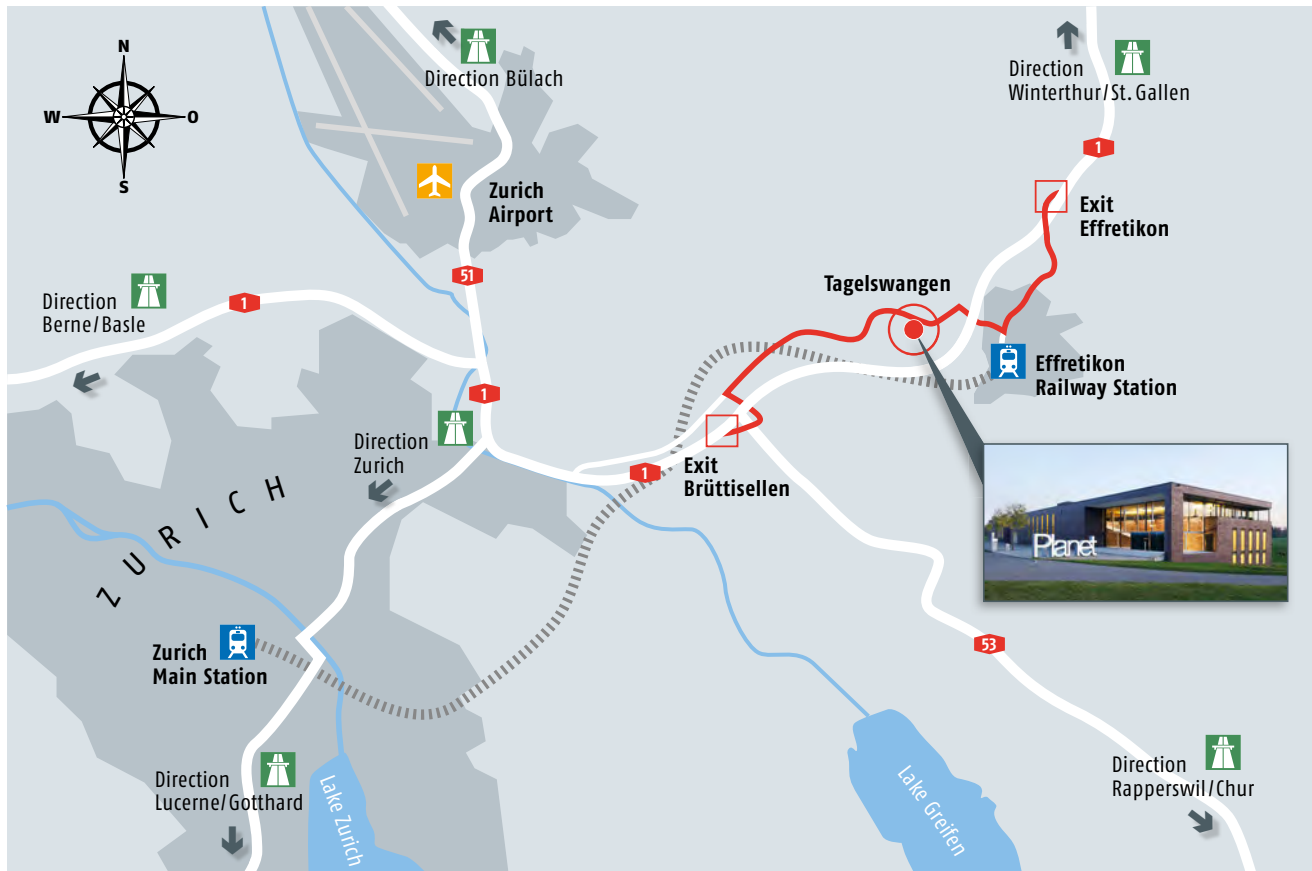

Planet GDZ AG integrated in **ASSA ABLOY** under succession plan.

		2010	Planet MinE-S und MinE-V für Türen von MINERGIE-Bauten mit Lüftungsanlagen, Luftausgleich bei gefangenen Räumen, Niedrigenergie- und Passivhäuser.
		2006	Planet RH und RF für besonders wellige und unebene Böden , Abdichtung bis 25 mm.
		2003	Planet MF, RO und PU Programm für Metall-, Alu-, PVC- und Holztüren , 20 x 20 mm mit 16 mm Dichtungshöhe.
		2002	Planet KG für Ganzglastüren – flächenbündig, diverse Ausführungen für Flügel- und Schiebetüren.
		2002	Planet Kantriegel mit Planet HS 13 mm Profil.
		2001	Planet Treibriegel-Lösung für Schlösser von WILKA, BKS, FUHR, MSL, BMH, Strenger, etc.
		2000	Bohrung 5 x 13 mm für abgeflachte Treibriegelstangen in Planet 20 mm und 13 mm Profil.
		2000	Planet HS zum tiefer Einlassen → Lippe immer geschützt, Türe kürzbar ohne Demontage der Dichtung.

Getting here

Planet GZD AG
Neustadtstrasse 2
8317 Tagelswangen
Switzerland

Scan code and you'll see
the directions straight
in Google Maps.

From Basle | Berne | Zurich

- Freeway A1 direction St. Gallen
- Exit Brüttisellen, turn to right into the Zürcherstrasse
- Drive straight on the Zürcherstrasse (approx. 3.5 km) until the beginning of Tagelswangen
- Turn to right into the Neustadtstrasse → you are directly in front of the company PLANET

From Winterthur | Schaffhausen | St. Gallen

- Freeway A1 direction St. Gallen
- Exit Effretikon, turn to right into the Rikonerstrasse
- Follow the Rikonerstrasse until the traffic lights
- Turn to right until the roundabout, drive straight on until the traffic lights
- Turn to left into the Zürcherstrasse and continue this road until the end of the village
- Turn left in the Neustadtstrasse → you are directly in front of the company PLANET

By public transport

- To Effretikon Railway Station by SBB trains 3, 7, 8 und 16
- From Effretikon by bus 650 towards 'Kemptthal, Bahnhof'
- Get off the bus at stop 'Tagelswangen, Dorf' → We are happy to pick you up at the stop

From Zurich Airport (Kloten)

- It takes you about 20 minutes with a car / taxi to reach the company PLANET

Terms and Conditions (GTC)

These general terms and conditions regulate the legal relationship between ASSA ABLOY (Schweiz) AG, Neustadtstrasse 2, CH-8317 Tagelswangen, hereinafter referred to as «PLANET» and its customers, hereinafter referred to as «PARTNER».

Purchase and distribution	<ul style="list-style-type: none"> I. PLANET shall supply PARTNER with products and services in accordance with its written order. II. The PARTNER shall assume responsibility for the performance rendered vis-à-vis the end user and shall also be obliged to provide the guarantee and warranty. III. PARTNER sells PLANET products and services under the brand name and equipment specified by PLANET.
Offers	<ul style="list-style-type: none"> I. Offers by PLANET are non-binding. II. Drawings, dimensions, illustrations, weight specifications and other performance data are only binding if they have been confirmed in writing by PLANET.
Orders	<ul style="list-style-type: none"> I. Orders placed by the PARTNER shall be made in writing. Orders by telephone are not accepted. II. The confirmed delivery times will be adhered to by PLANET as far as possible. Delays shall not entitle the PARTNER to refuse acceptance or to claim damages for any costs incurred. III. The delivery period shall be reasonably extended if PLANET does not receive the information necessary for the execution of the order in time or if the order is subsequently changed by the PARTNER. IV. Subsequent changes to an order confirmed by PLANET will only be accepted in writing. PLANET shall be entitled to charge the PARTNER for any additional administrative expenses incurred and any work that has already been performed.
Prices / Terms of payment	<ul style="list-style-type: none"> I. The prices and conditions of the current price list apply, ex works, subject to change without notice, including packaging. Any shipping costs as well as the value added tax are depicted in the order papers. II. PLANET expressly reserves the right to increase the confirmed or offered prices accordingly if the costs of manufacturing or procurement of the goods have increased after the quotation or order confirmation up to the delivery of the goods. In particular, the additional costs for imported goods caused by changes in exchange rates shall also be regarded as an increase in costs.
Deliveries	<ul style="list-style-type: none"> I. PLANET deliveries shall be on the account of and at the risk of partner. II. At the express request of PARTNER, PLANET shall take out transport insurance for the consignments for the account of PARTNER. III. PLANET shall determine the mode and route of dispatch without special instructions from PARTNER. IV. Benefit and risk shall in any case pass to the PARTNER at the latest when the delivery is handed over to the carrier at PLANET's works, even if freight or postage paid delivery of goods has been agreed. Exception for deliveries based on DDP Incoterms 2010. V. If dispatch is delayed for reasons for which PARTNER is responsible, the risk shall pass to the PARTNER at the time originally scheduled for delivery ex works. VI. A surcharge can be charged for direct deliveries.
Delivery periods	<ul style="list-style-type: none"> I. PLANET will adhere to agreed delivery dates as far as possible, but shall not guarantee their observance. II. Any postponement of delivery dates shall not entitle the PARTNER to refuse acceptance or to claim damages for any resulting costs. III. PLANET may reasonably extend the delivery period if PARTNER's details are missing or if the order has been subsequently amended.
Notice of defects	<ul style="list-style-type: none"> I. The PARTNER must inspect the delivery immediately upon receipt and report any defects in writing within 8 days of receipt, enclosing the delivery note, photographs of the packaging and goods. II. Hidden defects are dealt with within the framework of the warranty provisions and must in any case be reported in writing immediately after their discovery.
Retention of title	<ul style="list-style-type: none"> I. PLANET shall remain the owner of the goods until full payment has been received. II. PLANET is entitled to enter the retention of title in the appropriate register at the expense of the customer. III. In the event of PARTNER's breach of contract, in particular with regard to default in payment, PLANET shall be entitled to take back the goods after a reminder and corresponding warning and the PARTNER shall be obliged to surrender them.
Warranty	<ul style="list-style-type: none"> I. PLANET supplies faultless products and assumes warranty under the following conditions for warranted characteristics and for other defects which are demonstrably attributable to poor material, faulty construction or faulty processing by PLANET. II. The PARTNER shall inspect the delivered product immediately upon receipt and report any defects immediately. In the event of hidden defects, the PARTNER must report these immediately after they have been discovered in accordance with Clause 7. If PARTNER fails to inspect or notify the defects immediately, all warranty claims shall lapse. III. The period during which PLANET assumes warranty begins with the transfer of benefit and risk to the PARTNER pursuant to Clause 5 and shall be 24 months. After expiration of these periods, no more guarantee shall be assumed. IV. PLANET does not assume any warranty for consumables. V. Any warranty shall lapse if the PARTNER or third parties (e.g. the PARTNER's customers) have tampered with the products or have improperly handled or installed the products. VI. PLANET shall not assume any warranty for force majeure. VII. In the event of a warranty case, PLANET reserves the right to repair or replace defective products. VIII. PLANET's liability for PARTNER's damage caused by products for which AA SWITZERLAND assumes warranty in accordance with the provisions of this clause shall be limited to the value of the respective delivery.
Product safety	<ul style="list-style-type: none"> I. The statutory provisions of the Federal Product Safety Act (PrSG) shall apply. II. However, PLANET's liability is limited or does not exist if the current product information of PLANET is not observed by the PARTNER and its customers. III. The PARTNER shall be obliged to procure the necessary documents and to expressly draw its customers' attention to this information. IV. PLANET expressly draws PARTNER's attention to the fact that the safety regulations applicable in Switzerland must be observed when using the goods.
Returns	<ul style="list-style-type: none"> I. Goods delivered by PLANET in conformity with the order can only be returned with the prior consent of PLANET. If the products and the packaging are in perfect condition, stock items will be credited to a maximum of 70% of the invoiced amount. II. PLANET reserves the right to increase the deductions from the invoiced amount for additional work (e.g. repackaging, cleaning, etc.). III. PLANET shall not grant any credit for custom-made products or special dimensions of products.
Business and trade secrets	<ul style="list-style-type: none"> I. Both PLANET and the PARTNER shall comply with the valid guidelines of the Data Protection Act and shall neither exploit nor make available to other persons any business and trade secrets which have become known to them in any way as a result of their joint activities during or after the termination of the sales partnership.
ASSA ABLOY Code of Conduct	<ul style="list-style-type: none"> I. The ASSA ABLOY Group takes its social, ecological and ethical responsibility seriously and expects the same from its business partners. II. An integral part of the General Terms and Conditions is therefore the "Code of Conduct for Business Partners", which is available on our homepage www.assaabloy.ch as a PDF document or can be ordered from PLANET.
Intellectual property rights	<ul style="list-style-type: none"> I. PLANET is entitled to the exclusive intellectual property of the products it has developed, designed, constructed and produced. This includes all illustrations, drawings, plans, etc. II. PLANET is the sole owner of the patent rights, trademark rights, design rights and copyrights as well as all other related rights to the Planet products. III. Copying of Planet products as well as the unrestricted use of the products may violate these industrial property rights and requires the written consent of PLANET.
Place of performance / jurisdiction / applicable law	<ul style="list-style-type: none"> I. In all cases, the place of performance for deliveries and payments shall be PLANET's place of business in Tagelswangen. This is also the exclusive place of jurisdiction for all disputes arising from or in connection with the general business relations. II. PLANET reserves the right to take legal action against the PARTNER at its place of residence/registered office. III. This sales partnership is subject to Swiss law, excluding the rules of international private law and the Vienna Convention on Contracts for the International Sale of Goods.

Planet **US**: only **8 mm** – fits for all doors!
Examples of application:

For especially
narrow doors

For rebated doors
with **little space**

Inactive leaf seal
next to flush bolt
(without drill hole!)

Double rebated
door seals (thermal /
acoustic break)

Planet drop-down seals
→ **8 mm** profiles

3

Planet **US** 42-43

Planet **TW** 44-45

Planet US → 8 x 30 mm | ↓ 20 mm | ≤ 48 dB

Main features

- Especially for **narrow** doors
- Seal height up to **↓ 20 mm**
- Acoustic insulation up to **≤ 48 dB** in case of an optimal sealing
- Protected silicone lips since deeper embedded
- Door can be adapted on bottom without removal
- Unilateral and soundless release, silent seal
- Due to parallel drop-down no trailing on the floor
- Automatic compensation at inclined floors
- For single and Double leaf doors (seal next to flush bolt / driving bar rod)
- High-grade silicone lip, simple lift height adjustment
- Can be shortened up to the next shorter length on stock
- No extra need to cut off silicone at both ends
- 7 years warranty

Versions / options

- Planet US → **RD** ≤ 48 dB, smoke-shielding
- Planet US → **FH+RD** ≤ 48 dB, fire-retardant + smoke-shielding
- Option **sliding door** ≤ 48 dB
- Option **bevel lip** ≤ 48 dB, up to **↓ 24 mm**, for uneven floors
- Special versions on request

Planet HS-plus → FH+RD (fire-retardant + smoke-shielding) ≤ 55 dB

Automatic door drop-down seal Planet HS-plus → FH+RD ≤ 55 dB, for sound protection-, smoke-shielding and fire-retardant doors, release on hinge side with automatic compensation in case of an inclined floor, parallel drop-down, seal height up to $\downarrow 22$ mm, flush or deeper to put in groove with lip protection. Lateral fastening, self-extinguishing silicone lip. Aluminum profile → 13×30 mm.

Planet FT-plus → 13 x 30 mm | ↓ 22 mm | ≤ ≥55 dB

Main features

- Seal height up to ↓ 22 mm
- Acoustic insulation of ≤ ≥55 dB in case of an optimal sealing
- Unilateral and soundless release, silent seal
- Due to parallel drop-down no trailing on the floor
- Automatic compensation at inclined floors
- One groove width for Planet FT and RF (uneven floors)
- For double leaf doors with flush bolt or driving bar
- Also suitable for Planet Socle (→ refer to Planet Socle)
- High-grade silicone lip, simple lift height adjustment
- Can be shortened up to the next shorter length on stock
- No extra need to cut off silicone at both ends
- 7 years warranty

Versions / options

- Planet FT-plus → FH+RD ≤ ≥55 dB, fire-retardant + smoke-shielding
- Option Double-shortening → refer to chapter Accessories | TR125
- Special versions on request

Door types with Planet FT-plus

Double leaf doors → refer to chapter Accessories | Flush bolt, drilling

Planet FT-plus → FH+RD (fire-retardant + smoke-shielding) ≤ 55 dB

Automatic door drop-down seal **Planet FT-plus → FH+RD ≤ 55 dB**, for sound protection-, smoke-shielding- and fire-retardant doors, release on hinge side with automatic compensation in case of an inclined floor, parallel drop-down, seal height up to $\downarrow 22$ mm, flush to put in groove. Fastening on the bottom, self-extinguishing silicone lip. Aluminum profile → **13 x 30 mm**.

Planet HS → 13 x 30 mm | ↓ 22 mm | ≤ 48 dB

Main features

- Seal height up to ↓ 22 mm
- Acoustic insulation up to ≤ 48 dB in case of an optimal sealing
- Protected silicone lips since deeper embedded
- Door can be adapted on bottom without removal
- Unilateral and soundless release, silent seal
- Due to parallel drop-down no trailing on the floor
- Automatic compensation at inclined floors
- One groove width for Planet HS and RH (uneven floors)
- For double leaf doors with flush bolt or driving bar
- High-grade silicone lip, simple lift height adjustment
- Can be shortened up to the next shorter length on stock
- No extra need to cut off silicone at both ends
- 7 years warranty

Versions / options

- Planet HS → RD ≤ 48 dB, smoke-shielding
- Planet HS → FH+RD ≤ 48 dB, fire-retardant + smoke-shielding
- Option sliding door ≤ 48 dB
- Option pivot door
- Silicone lip extended by 8 mm
- Anti-bacterial silicone lip is optional
- Possibility of silicone-free (TPE) execution
- Option Double-shortening → refer to chapter Accessories | TR125
- Special versions on request

Planet KT → FH+RD (fire-retardant + smoke-shielding) ≤ 48 dB

Automatic door drop-down seal **Planet KT → FH+RD** ≤ 48 dB, for sound protection-, smoke-shielding and fire-retardant doors, release on hinge side with automatic compensation in case of an inclined floor, parallel drop-down, seal height up to ↓ 18 mm, flush or deeper to put in groove with lip protection. Lateral fastening, self-extinguishing silicone lip. Aluminum profile → 13 x 25 mm.

Planet^{news}

Planet SN – zero-force!
The new standard for sliding doors.

NEW

Advantages:

- ✓ **Release force only 1 N/m!**
- ✓ No restoring force, no lock
- ✓ Works with soft close systems
- ✓ Running as pocket door or in front of the wall

Closing edge

Rear

3

Planet **SN** 64–65

Other Planet sliding door solutions 66

Planet SN (sliding door) → 22 x 30 mm | ↓ 7–16 mm | ≤ 44 dB

Main features

- Planet SN for sliding doors
- No lock needed because of **zero-force release**
- Seal height ↓ **7–16 mm**
- Floor guide SN kit – versions short (standard) and long (as option) – **for door gap 7–10 / 10–13 / 13–16 mm**
- Release force only **1 N/m**
- Release through floor guide with parallel drop-down
- Compact space-saving solution with integrated floor guiding groove
- Automatic compensation at inclined floors
- Acoustic insulation up to ≤ **44 dB** in case of an optimal sealing (at an air-gap of 7 mm)
- High-grade silicone lip
- Can be shortened up to the next shorter length on stock
- Seal easily removed by detaching end brackets
- 7 years warranty

Versions / options

- Planet SN → RD ≤ **44 dB**, smoke-shielding
- Closing DIN L or DIN R
- Special versions on request

Planet SN → RD (smoke-shielding) ≤ 44 dB

Automatic door drop-down seal Planet SN → RD ≤ 44 dB, for sound absorption and smoke-shielding sliding doors, release through floor guide with parallel drop-down, seal height ↓ 7–10 / 10–13 / 13–16 mm, flush to put in groove. Silicone lip, lateral fastening incl. floor guide. Aluminum profile → 22 x 30 mm.

Other Planet sliding door solutions

Main features

- Same geometry as for double leaf / folding doors
- Parallel drop-down
- Same characteristics as double leaf / folding doors
- Especially smooth release (about 25 N / m)
- Flat release knob
- Simple lift height adjustment
- Warranty 7 years

To consider:

- Plan with a door holding device from customer (e.g. HAWA, etc.)
- DIN L / DIN R
- Option sliding door

DIN left

Sliding door to the left
(like example above)
= DIN left

DIN right

Sliding door to the right
(like example above)
= DIN right

Sliding door solutions up to 6000 mm length

Planet US → 8 x 30 mm
+ Option sliding door

Planet MinE-F / S (F=rebated doors/S=soundproof)

→ 8 x 30 mm / 25 x 43 mm | ↓ 20 mm | ≤ 27 dB

Main features

- Especially for passive building and low energy houses
- Suitable for rebated doors
- Closed rooms with Ventilation systems / toilet / bathroom
- Air circulation / air equalization
- Seal height up to ↓ 20 mm
- Sound absorption on seam ≤ 27 dB at an air-gap of 7 mm
- Increased sound absorption at simultaneous air passage
- Air passage 200 m³/h
- Reading 30 m³/h at a pressure difference of 3,9 Pa (door width 1050 mm)
- High-grade silicone lip, simple lift height adjustment
- Compensation of 15 mm in case of sloping floor at door width of 1000 mm
- Automatic compensation at inclined floors
- No extra need to cut off silicone at both ends
- 7 years warranty

Versions / options

- Planet MinE-F / S ≤ 27 dB
- Planet MinE-F / S → FH ≤ 27 dB, fire-retardant
- Airlock doors
- Special versions on request

**Planet X3: for exterior doors with zero threshold
– now with unilateral hinge-side release!**

NEW

- ✓ Keeps out driving rain **7A/9A**
- ✓ Without drainage channel
- ✓ For renovations and new builds

Planet X3 → see page 80–83

Planet drop-down seals → against **driving rain**

3

Planet **X3** 80–83

Principle of function 82

Advantages 83

Planet X3 → 22 x 30 mm | ↓ 5 – 12 mm | ↔ 2 – 6 mm | 7A/9A | ≤ 52 dB

Main features

- **New: unilateral hinge-side release!**
- Keeps out driving rain (7A/9A, ift certified), for entrance doors and balcony doors
- **No drainage channel** required
- 3 simultaneous sealing movements: downwards, to the left and to the right, separately adjustable
- Seal height ↓ 5 – 12 mm, lateral movement ↔ 2 – 6 mm
- Acoustic insulation up to ≤ 52 dB in case of an optimal sealing
- High-grade silicone lip
- From 68 mm door thickness
- Can be shortened up to the next shorter length on stock with Planet set for shortening X3
- Simplified short process, now with push-fit without adhesive
- 2 years warranty

Versions / options

- Planet X3 → RD ≤ 52 dB, smoke-shielding, trimmable, unilateral release
- Planet X3 → RD ≤ 52 dB, smoke-shielding, made to measure, ready for installation, unilateral release
- Special versions on request

Required accessories

- Assembly set X3 (including)
- Corner plate set X3

Door types with Planet X3

Single doors – hinged

Planet X3 → RD (smoke-shielding) ≤ 52 dB, unilateral release

Automatic door drop-down seal **Planet X3 → RD ≤ 52 dB**, against driving rain (7A/9A, ift certified) for sound protection-, smoke-shielding doors. Unilateral hinge-side release, 3 sealing movements: Seal can be adjusted to the left, downwards and to the right, seal height ↓ **5 – 12 mm**, side stroke adjustment ↔ **2 – 6 mm**, flush for grooving or 2 mm deeper with lip protection. Silicone lip, lateral fastening. Aluminium profile → **22 x 30 mm**.

Principle of function

Planet X3

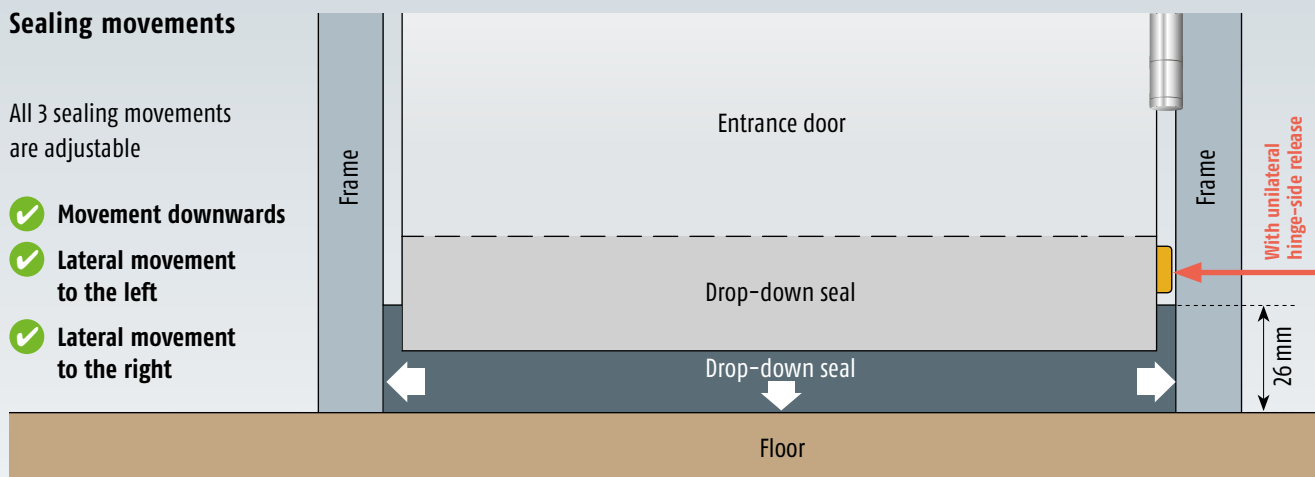

- ✓ 3 simultaneous sealing movements
- ✓ Only 1 actuation button
- ✓ 2 lateral lift settings

Sealing movements

All 3 sealing movements are adjustable

- ✓ Movement downwards
- ✓ Lateral movement to the left
- ✓ Lateral movement to the right

Preparation

- ✓ Groove in entrance door 22x30 mm
- ✓ 2 sealing surfaces on frame
- ✓ Level floor

Advantages

Planet X3

No step to trip over

7A certified, no drainage required, economical

Easy to retrofit: Planet F140 click-threshold (above) or Planet F130 click-threshold for levelling (below)

Planet F120 click-threshold – extremely flat, for renovation and new buildings

- ✓ Simple initial adjustment
- ✓ Fits all floor grooves of 5 – 12 mm
- ✓ Adjustable lateral movement: 2 – 6 mm
- ✓ Fits all door rebates
- ✓ Quick readjustment
- ✓ Easily trimmable, no gluing necessary

Planet KG-F10 | F12

→ 16,5 x 46 / 52 mm | ↓ 18 mm | ≤ 48 dB

Main features

- Seal height up to ↓ 18 mm
- Acoustic insulation up to ≤ 48 dB in case of an optimal sealing
- For one and double leaf all-glass doors, with a thickness of 10 and 12 mm
- Planet KG-F10 | F12 to be attached and glued
- Planet drop-down seal cemented in F10 / F12 protection profile
- Unilateral and soundless release, silent seal
- Due to parallel drop-down no trailing on the floor
- Automatic compensation at inclined floors
- High-grade silicone lip, simple lift height adjustment
- Can be shortened up to the next shorter length on stock
- 7 years warranty

- Silicone lip extended by 8 mm
- Anti-bacterial silicone lip is optional
- Possibility of silicone-free (TPE) execution
- Special versions on request

Door types with Planet ZA

Double leaf doors → refer to chapter Accessories | Flush bolt, drilling

More functions

Technical specifications

Profile material	aluminum, → 15 x 30 mm
Groove size	width 15,1 mm with depth 30,5 up to 40 mm
Seal profile	high-grade silicone or high-grade self-extinguishing silicone
Seal height	up to ↓ 22 mm
Sound absorption value	up to ≤ 48 dB at 7 mm space to the floor; up to ≤ 42 dB at 18 mm space to the floor
Lift height adjustment	on the release knob with an Allen key 3 mm
Lengths in stock	335, 460, 585, 710, 835, 960, 1085, 1210, 1335, 1460 mm
Special lengths	on request up to 6000 mm for wing- and sliding doors
Release	unilaterally on hinge side
Can be shortened	up to the maximum of 125 mm (335 mm only 115 mm)
Fastening	on the side with stainless steel angle brackets and screws
Frame protector plate	stainless, hammer fixed, 20 x 20 mm
Test approvals	on request

Option: Planet ZA with driving bar rod Ø10 mm → refer to chapter Accessories | driving bar rods

Option: Planet ZA with Planet drill hole Ø10 mm for driving bar rod Ø10 mm → refer to chapter Accessories | driving bar rods

Planet assembly set ZA

Option: Planet ZA: silicone lip extended by 8 mm, with fastening brackets, release side

Planet ZA → RD (smoke-shielding) ≤ 48 dB
Automatic door drop-down seal Planet ZA → RD ≤ 48 dB, for sound absorption and smoke-shielding doors, release on hinge side with automatic compensation in case of an inclined floor, parallel drop-down, seal height up to ↓ 22 mm, flush or deeper to put in groove with lip protection. Silicone lip, lateral fastening. Aluminum profile → 15 x 30 mm.

Advertising text

Planet ZA → FH+RD (fire-retardant + smoke-shielding) ≤ 48 dB
Automatic door drop-down seal Planet ZA → FH+RD ≤ 48 dB, for sound protection-, smoke-shielding and fire-retardant doors, release on hinge side with automatic compensation in case of an inclined floor, parallel drop-down, seal height up to ↓ 22 mm, flush or deeper to put in groove with lip protection. Lateral fastening, self-extinguishing silicone lip. Aluminum profile → 15 x 30 mm.

Planet GH → 14 x 47,5 mm | ↓ 42 mm | ≤ 45 dB

Main features

- Seal height ↓ 20 – 42 mm
- Acoustic insulation up to ≤ 45 dB in case of an optimal sealing
- Unilateral and soundless release, silent seal
- Due to parallel drop-down no trailing on the floor
- Automatic compensation at inclined / uneven floors
- For double leaf doors with flush bolt or driving bar
- Also suitable for Planet Socle (→ refer to Planet Socle)
- High-grade silicone lip, simple lift height adjustment
- Can be shortened up to the next shorter length on stock
- No extra need to cut off silicone at both ends
- 7 years warranty

Versions / options

- With Socle profile for later fastening
→ on request
- Possibility of lateral fastening brackets
→ refer to chapter Accessories | Options
- Planet Drill hole ∅5 x 13 mm (observe «paddle length» of the circular bar)
- Special versions on request

Door types with Planet GH

Double leaf doors → refer to chapter Accessories | Flush bolt, drilling

Planet Socle
Planet Socle for new and existing doors, laterally screwed down.

A: Assembly outside

Standard version

Accumulating point: Band side on foil on the frame

B: Assembly inside

In special cases

Accumulating point: Lock side on auxiliary block with approach ramp min. 5 x 20 mm. End position trigger on level ± 5

Planet drop-down seals for uneven floors

→ Appropriate for one and double leaf folding doors made from wood, aluminum, plastic and metal as well as sliding doors and accordion type walls

For especially uneven floors

- Planet RH, RF, MinE, RF with Soble
- All Planet types with option bevel lip

Uneven floor

For crooked floors

- All Planet types with a round or bevel lip

Crooked floor

Crooked floor

For concave and convex floors

- Planet RH, RF, MinE, RF with Soble
- All Planet types with option bevel lip

Convex floor

Concave floor

Planet drop-down seals assembly at the top

Example with Planet HS drop-down seal

To observe

- The Planet silicone lip leaves no traces, but the last coating of paint on the ceiling in the zone of the seal must be smooth and non-abrasive. It is highly recommended that the **color of the ceiling is not white** (dust accumulation possible).
- The Planet drop-down seals of all kinds are appropriate for the assembly at the top.

Order specifications

- **Option:** assembly at the top

Example:

Planet type	Prod. code	Option
HS	76xxx*	assembly at the top

* xxx = refer to price list for profile length

Glass door with wooden frieze → profile dim. 16,5 x 46 mm

Example: glass doors with wooden strip and continuous drop-down seal

Detailed view of hinge side

- Planet KG continuous drop-down seal
- 8 mm glass section with Planet KG-F8 and protection profile
- Fair separation between glass and wood section

Detailed view of lock side

- Continuous drop-down seal
- Fastening with assembly set HS
- The solution for glass and wood section

Planet drop-down seal KG-F8 and protection profile KG-F8

- Solution possible with Planet KG-F8 | F10, KG-D8 | D10 and KG-U (refer to chapter drop-down seals | glass)

Drop-down seal for folding doors

→ Example with two Planet HS drop-down seals

Execution

GG is available for all Planet types (Planet FT, HS a.s.o.), in pairs with mutual lift height release, the running wing in the frame.

Order specification: _____ number of pairs with lengths (fixed measure)

Drop-down seal: mutual release in pairs

(refer to chapter accessories | options, folding doors)

Drop-down seal with 2 sealing levels

→ Example with Planet US and Planet HS drop-down seals

Planet KR flush bolt

→ for profile dimension 13 and 20 mm

Main features

- Continuous drop-down seal Planet
- Sound protection
- Appropriate for Planet profile dimension 13 and 20 mm
- Extra long version for high doors available
- With integrated plastic guide
- Execution for DIN L and DIN R
- Planet drop-down seal prepared to fix dimension
- Adjustable locking bolt
- 7 years warranty

Versions / options

- Round lock plate below: 250 x 15 x 15 mm
- Angular lock plate below: 250 x 18 x 17 mm (on request)
- Round lock plate on top: 250 x 15 x 15 mm
- Round lock plate on top, long, (for easier operation at high doors): 600 x 15 x 15 mm
- Angular lock plate on top: 250 x 18 x 17 mm (on request)
- Surface: brushed, mat nickel-plated
- Lock plate shape: 15 mm = round
18 mm = angular (on request)

Door types with Planet KR

Planet KR flush bolt

Planet KR flush bolt, width 15 / 18 mm, appropriate for Planet profile dimensions 13 and 20 mm, bolt cross section Ø5x13 mm, adjustable in length, for continuous sealing lips, with lever.

What drill hole fits which profile widths?

Ø5x13 mm

for Planet KR flush bolt
Ø5x13 mm and
13 / 20 mm profiles

Ø10 mm

for driving bar rods
Ø10 mm and
15 / 20 mm profiles

Ø8 mm

for driving bar rods
Ø8 mm and
13 mm profiles

Planet Drill hole Ø 8 mm

→ for profile dimension 13 mm

Main features

- Drill hole → Ø 8 mm
- For driving bar rods
- For double leaf doors
- Continuous Planet drop-down seal
- Sound protection
- Appropriate for Planet HS, RH, FT and RF
- For back set from 20 up to 100 mm
- Prepared to fix dimension
- 7 years warranty

Accessories

- For lock supplier refer to technical data-sheets of the lock manufacturers: e.g.

→ see pages 151 – 161

Applicable for

- Smoke-shielding
- Fire-retardant and smoke-shielding

Door types with Planet Drill hole Ø 8 mm

Technical specifications

Cross section of rod	→ Ø 8 mm
Back set	20–100 mm, end of seal until center of hole
Rod supplier	for lock supplier refer to the technical data sheets of the lock manufacturers, e.g. Wilka, BKS, FUHR, BMH, MSL, etc.

Calculation of the shortest seal length with a drilling

Planet Drill hole Ø10 mm for drill bar rod available with customer

Planet Drill hole Ø10 mm, for round end drill bar rod available with customer.

Planet TR 125 double-shortening

→ for double doors – hinged, shelf life related, prepared drill holes

Main features

- Shelf life related to dealers and system manufacturers
- Prepared drill hole, factory-made
- Adaptable back set
- Can be shortened by 125 mm or 100 mm
- Applicable as DIN L and DIN R
- All features of the seal are unchanged
- Available for order: Planet FT, HS, RH, RF, MF, RO, RS, PU, HS-plus, FT-plus, MF-plus, RO-plus

Correct order of shortening

- 1 At first shorten the back set
- 2 After that shorten the seal length

Order specifications

Seite 1 von 1

Betrifft: Treibriegelstange für Türdichtungen
(Typ Planet HS, RH, FT, RF, MF, RO, RS, PU, MinE)

Für die Verwendung mit den oben aufgeführten Türdichtungen ist die grafisch dargestellte Treibriegelstange vorzusehen.

Diese Türdichtungen sind so schmal dass eine normale Stange mit einem Ø 10 mm nicht verwendet werden kann!

Die Firma Planet produziert Absenk-
dichtungen mit einer 5x13 mm breiten
Durchführung unter Angabe von Länge,
Dornmass und DIN L / DIN R.

Ausschreibungstext:

Treibriegelstange (Rohr), verzinkt,
unteres Stangenende abgeflacht
von Ø 10 mm auf 5x13 mm,
M6 mm Gewinde,

Mass a = _____ mm

für Verwendung mit Türdichtung
der Firma Planet Typ Planet.

Treibriegelstange 9006 für schmale Türdichtungen
(verfügbare Längen insgesamt)

Stangenlänge a	Artikel-Nr.	Verwendbar für BKS-Schlosstyp
917 mm	B 9006 0700	B 1793 / B-18900 / B-18910 / B-18960 / B-19900
926 mm	B 9006 0701	B 1792
966 mm	B 9006 0702	B 2189 / B 2190 / B 2390 / B 2391 / B 2392 / B 2394 / B 2397
1414 mm	B 9006 0703	B 1899
1440 mm	B 9006 0704	B 1899

Als Bodenmulde empfiehlt sich der Typ Planet / Nr. 900 276-0

Planet drop-down seals

Bernese Oberland

Planet BM $\varnothing 5 \times 13$ mm narrow floor strike

→ 3 types available for corrections of 0 mm, ± 2 mm, ± 4 mm

Single

$\varnothing 5 \times 13$ mm

New with
**anti-rattle
feature**

Main features

- 3 types available for corrections of ± 4 mm (see measure C) (also available as kit of 3 pieces, 0 mm, ± 2 mm, ± 4 mm)
- Very simple adjustment
- Narrow guide, anti-rattle feature
- Including sliding surface for automatically locking locks
- Appropriate for sound-, smoke- and fire-protection doors
- Bag closed, simple cleaning
- Simple assembly, no need of special tools
- Material made of stainless steel / plastic
- Polished surface
- Invisible under the door

Appropriate for:

- Driving bar rod $\varnothing 5 \times 13$ mm and Planet KR flush bolt (for rod delivery → refer to chapter flush bolt and chapter drilling)

Door types with Planet BM $\varnothing 5 \times 13$ mm narrow floor strike

More functions

Planet BM-R Ø15 / 40 mm floor strike (stainless steel)

Floor strike Planet BM-R Ø15 / 40 mm appropriate for Planet KR Ø5 x 13 mm, driving bar rods Ø5 x 13 mm and round rods up to max. Ø14 mm, for double leaf doors and sound-, smoke- and fire-protection doors, stainless steel (polished surface).

Planet BM-R Ø 11 mm (25 / 40 mm) floor strike

→ for driving bar rods Ø10 mm

Main features

- For flush bolts and driving bar rods Ø10 mm
- Spring-loaded dust protection cap prevents dirt being deposited
- Very easy installation of drilled hole
- Material in stainless steel
- Appropriate for sound protection-, smoke-shielding and fire-retardant doors
- Elegant design solution, invisible under the door (BM-R Ø 11 / 25 mm)

Door types with Planet BM-R Ø11 / (25 / 40 mm) floor strike

More functions

Technical specifications

Material	stainless steel with dust cover suspended
Overall dimensions	25 / 40 x 39 mm / 19 x 36 mm
Drilling	Ø19 x 36 mm to be glued
Dust protection cap	2 versions: Ø11 / 25 mm and Ø11 / 40 mm
Floor material	all types, e.g. wood, concrete, stone and slabs etc.

Planet F click-thresholds

thermally separated

Modular system for greater freedom of design

Especially convenient is the link between the drop-down seal Planet X3 with unilateral release and the modular click-threshold system. Thanks to the modular system, Planet X3 can be combined in different versions with the innovative system. The thermally insulated flat threshold can be traversed with high loads and creates an optimal transition between inside and outside due to the true zero threshold.

Main features

- No step to trip over
- Simple click-system
- Perfect for new builds and renovations
- Invisible screw connection
- Thermal separation
- Optimised for use with Planet drop-down seals, freely positionable sealing surface

Planet F120

- Extremely flat, perfect for new builds
- Floor recess only 5 mm

Planet F140

- Surface-mounted, perfect for renovation
- No floor recess required

Planet F130

- For levelling

Planet F120 click-threshold

thermally separated | → 120 x 2,5 mm

Main features

- Thermally broken flat threshold
- Extremely flat, perfect for new builds (also for renovation)
- Floor recess only 5 mm
- Stable and can be ridden over
- Simple click-system
- Optimal transition between inside and outside
- For screw- or glue-fixation
- Invisible screw connection
- Optimised for use with Planet drop-down seals, freely positionable sealing surface
- In combination with Planet X3 guaranteed impermeable to driving rain

Versions

- Surfaces aluminum: silver anodised EV1

Planet F120 click-threshold → thermally separated

Thermally separated, modularly constructed threshold **Planet F120 click-threshold**, suitable for barrier-free transitions. Optimum link between inside and outside, with invisible screw connection, for only 5 mm floor recess. Silver anodised EV1 (aluminium). Subsequent replacement of the aluminium profiles, optimised for use with drop-down seals.

Planet F140 click-threshold

thermally separated | → 140 x 7,5 mm

Main features

- Thermally broken flat threshold
- Simple click-system
- Optimal transition between inside and outside
- For renovations and new builds
- Surface-mounted, perfect for renovation
- No floor recess required
- Barrier-reduced height
- Stable and can be ridden over
- For screw- or glue-fixation
- Invisible screw connection
- Optimised for use with Planet drop-down seals, freely positionable sealing surface
- In combination with Planet X3 guaranteed impermeable to driving rain

Planet F130 click-threshold → thermally separated

Thermally separated, modularly constructed threshold **Planet F130 click-threshold**, suitable for barrier-free transitions. Optimum link between inside and outside, with invisible screw connection, suitable for construction situations with step heels. Silver anodised EV1 (aluminium). Subsequent replacement of the aluminium profiles, optimised for use with drop-down seals.

Gutmann WESER ZERO threshold

thermally separated

Main features

- Thermally broken flat threshold
- Absolute barrier-free **zero threshold**
- **No drainage channel** required
- Optimal transition between inside and outside
- For renovations and new builds
- For 78 mm and 88 mm frames
- Only 20 mm floor recess
- Also for doors opening outwards
- 5 different standard lengths, can be shortened to fit
- 2 years warranty

Versions

- Gutmann WESER ZERO 78

Gutmann WESER ZERO threshold → thermally separated

Thermally broken threshold **Gutmann WESER ZERO**, suitable for even transitions. Optimal transition between inside and outside, for only 20 mm floor recess. Silver anodised EV1 (aluminum).

Planet F threshold plate

→ 35 x 6,5 mm / 50 x 6,5 mm

Main features

- Convenient to bridge a level up to **6 mm**
- From **30 dB** recommended separation of the supporting floor
- Threshold plate to paste
- Optimal connection of two prefabricated floors
- An even block surface for all Planet drop-down seals for an optimal sound protection.
- With two toothed adhesive cement grooves for an enlarged surface to make sure an optimal bond
- Separating underlay advisable
- 7 years warranty

Versions / options

- Width 35 or 50 mm
- Surfaces: silver anodised EV1
- Stainless, polished surfaces (→ refer to chapter Accessories)
- Holes to Planet F threshold plate (→ refer to chapter Accessories)

Assembly

- Paste with flexible cement or sealing material on a surface free of grease and dust (e.g. TEROSTAT 935)
- On any surface, except deep-pile fabrics, they must be cut flush to edge

Door types with Planet F

Threshold plate **Planet F** convenient for graded and even passings. Optimal support surface to glue on. Silver anodised EV1 (aluminum). With two toothed adhesive cement grooves for an enlarged surface to make sure an optimal bond.

Planet BT floor separation threshold

→ 40 x 60 mm / 60 x 60 mm

Main features

- For a perfect acoustic interruption
- From ≤ 30 dB recommended separation of the supporting floor
- Very nice optical solution
- An even block surface for all Planet drop-down seals for an optimal sound protection.
- Is cast in the floor base
- Large adjustment range
- Suitable for one or two sealing planes
- Basic profile prepared for mortar protection
- Basic profile prepared with acoustic insulation stripes on the left and right
- 7 years warranty

Versions

- Planet BT 803, 40 mm, complete
- Planet BT 804, 60 mm, complete

Explanation of DIN direction

Single leaf doors, hinged

DIN L (right handed)
Door hinges left = **DIN left**

DIN R (left handed)
Door hinges right = **DIN right**

Sliding doors

DIN left
Sliding door closing to the left (like e.g. above)
= **DIN left**

DIN right
Sliding door closing to the right (like e.g. above)
= **DIN right**

Glass sliding doors

DIN left
Glass sliding door closing to the left (like example above) = **DIN left**

DIN right
Glass sliding door closing to the right (like example above) = **DIN right**

Shorten the Planet drop-down seals

→ Example to shorten the Planet HS

Shortening dimensions

Never shorten on the release knob side!

100 mm at maximum:
Planet FT, RF, GH, BL

125 mm at maximum:
Planet HS, RH, KG, MF, RO, PU, SL

Mark the location of cut

Single-wing applications. Shorten with circular or hand saw.

Double-wing applications or a small fold air on lock side. Shorten the seal in released condition.

(→ refer also to Planet installation instructions)

Debur the edges and remove the sawdust.

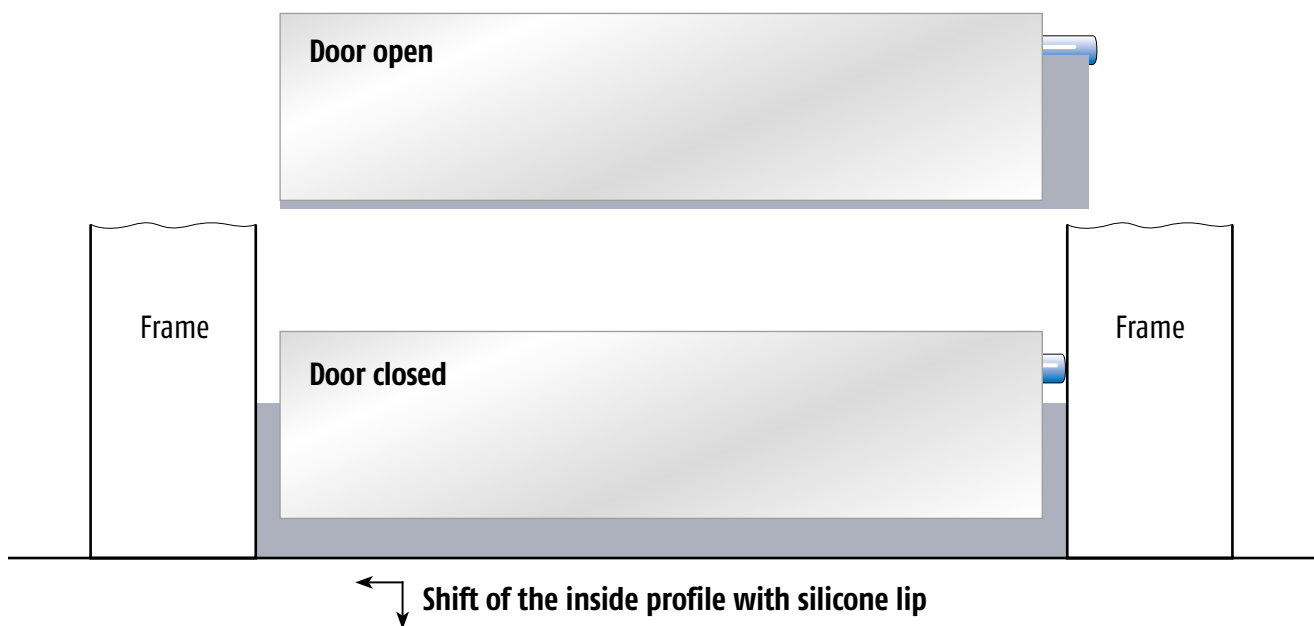

Adjusting the silicone lip – no need to cut!

→ All Planet drop-down seals are pre-adjusted, i.e. to fit a frame gap of about 3 mm and a floor gap of some 6 – 7 mm. Normally, no further adjustment is required.

Sideways shift of the inside profile with the silicone lip

The special, patented mechanism of the Planet drop-down seal with parallel drop-down and sideways shift normally only requires a projection of the silicone lip on the release side of the floor seal (= hinge side of the doors).

When the floor seal drops, this protrusion of some 5 – 6 mm for a floor gap of about 7 mm is shared equally on both sides (lock and hinge sides) of the doors and thus reliably seals the gap (about 3 mm) between frame and door leaf.

Adjusting silicone projection

If the dimensions differ from standard values, adjustment work as indicated in the installation instructions will be required and the silicone projection may also need adjustment. By massaging the silicone lip to the outside or the inside, the silicone projection can be permanently changed.

By the way

All our drop-down seals can be ordered with precisely defined silicone projection:
Option silicone lip protrudes → hinge side: ... mm / → lock side: ... mm (Article No. 900440)

Lift height adjustment of the Planet drop-down seals

→ Release knob always on hinge side for double-leaf / folding doors, on lock side for sliding doors

Precise adjustment

by rotating the release knob high lift height, great fold space with a 3 mm Allen key.

⊕ high lift height, great fold space
⊖ small lift height, small fold space

Correct final position of the release knob, the pin is away from the hinge pivot.

Please observe!

Adjust the lift height until the silicone lip tightens well on the floor at closed door. Avoid any pressure carried out to the floor. If the bottom gap of the door is light-tight, you have achieved maximum noise insulation.

Simply smart – release knob from Planet

General information, maintenance for Planet drop-down seals

→ The following information regarding the drop-down seals and accessories has to be followed.
There is no warranty or liability on our part in case of disregard.

General remarks and supplements for the use, operation and maintenance of Planet drop-down seals

1. Coating or laquer

Do not coat or paint the Planet drop-down seal.

2. Maintenance

Check every two years for function (release knob, sealing blade, lift height) and dirt, clean if necessary. Never grease the sealing lip.

Planet MinE: vacuum the door edge regularly. Every 2 years uninstall the angle bracket on one side. Take out the seal to vacuum. Installing in the reverse order. Check function (release knob, sealing blade, lift height). Never grease the sealing lip.

3. Check

The Planet drop-down seal has to be checked every second year for function and damages.

4. Correct fastening of the Planet drop-down seals to be fixed from the bottom

It is important to choose the larger door part for the fastening. We recommend to fix the nails or screws only on the larger part. Do not drill or treat the drop-down seal in any way, except the regular processing to shorten according to our installation instructions. The holes for flush bolts and driving bar rods are prepared by the factory.

Correct

Wrong

Wrong

Wrong

5. Important!

Do never press the drop-down seal during the fastening p otherwise the drop-down seal will be damaged or results in a malfunction.

6. Workmanlike use

A Planet drop-down seal in the sense of this definition is a component installed with regard to tighten doors, sliding doors, accordion doors of any kind and materials against sound, smoke and draught.

Important:

We reserve the right to add or modify at any time this information and instructions

Überdruck getestete Dichtungen für Anwendung in geprüften Metall-Brandschutztüren bis 3 Stunden, für Holz-Brandschutztüren bis 1 1/2 Stunden und für Brandschutztüren mit Holzkern bis 20 Min. Planet RS, RS und SI sind für Holztüren nicht zugelassen.

Positive-pressure-tested gasketing materials for fire doors for application to hollow-metal doors rated up to 3h, wood-composite-type 1 1/2h and wood core rated up to 20 minutes, category I. Planet RS, RS and SI are not approved for wooden doors.

Joints testés par surpression pour l'application dans des portes coupe-feu approuvées jusqu'à 3 hrs, pour portes coupe-feu en bois jusqu'à 1.5 hrs et pour portes coupe-feu avec noyau de bois jusqu'à 20 min. Planet RS, RS et SI ne sont pas approuvés pour des portes en bois.

Materiales acreditados para la presión y puertas resistentes al fuego (3 h, puertas metálicas; 90 min. para puertas ignífugas de madera y para puertas de madera resistentes al fuego 20 min.). Planet RS, RS y SI no tienen certificados de resistencia al fuego, en puertas de madera.

Уплотнители, испытанные под давлением для применения в испытанных противопожарных дверях металлических до 3 часов, деревянных до 1 1/2 часов и с деревянной сердцевиной до 20 мин. Planet RS, RS, SI недопустимо применять для деревянных дверей.

Verwendungszweck: Planet-Dichtungen werden in Türen eingebaut und verschliessen die Bodenlücke automatisch. Bitte Anleitung sorgfältig lesen.

Intended use: Planet seals should be installed in doors and closing the bottom door gap automatically. Please read the instructions previously.

Emploi prévu: les joints Planet sont montés dans des portes et ferment la jointure au sol automatiquement. Lire les instructions au préalable.

Finalidad de su utilización: Los Planet deben ser instalados en las puertas, para sellar el espacio de luz hasta el suelo automáticamente. Por favor, léanse las instrucciones de antemano.

Область применения: Уплотнители Planet встраиваются в двери и сами закрывают зазор под дверью. Прочитайте, пожалуйста, руководство заранее.

Ajustar la carrera con una llave Allen (3 mm), hasta que el labio de silicona apoya bien en el suelo. Evitar una presión excesiva contra el suelo. (espacio bajo la puerta: ver I, para el ajuste de carrera)

Настроить ход шестигранным ключом (3 мм), избежать давления на пол! (смотри высоту уплотнителя I), проверить работоспособность

Wartung: Alle zwei Jahre auf Funktion (Klopff, Dichtlippe, Hub) und Verschmutzung prüfen, falls nötig Reinigen. Dichtlippe nicht fetten.

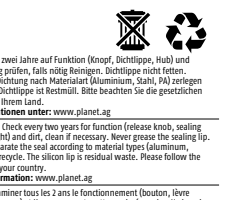

Entsorgung: Dichtung nach Materialart (Aluminium, Stahl, PA) zerlegen und recyceln. Dichtlippe ist Restmüll. Bitte beachten Sie die gesetzlichen Vorschriften in Ihrem Land.

Mehr Informationen unter: www.planet.ag

Maintenance: Check every two years for function (freease knob, sealing blade, lift height) and dirt, clean if necessary. Never grease the sealing lip.

Recycling: separate the seal according to material types (aluminum, steel, PA) and recycle. The silicon lip is residual waste. Please follow the regulations in your country.

For more information: www.planet.ag

Entretien: examiner tous les 2 ans le fonctionnement (bouton, lèvres d'étanchéité, course) et l'encrassement, nettoyer si nécessaire. Ne jamais graisser la lèvres d'étanchéité.

Recyclage: réduire le joint à ses composants (alü, acier, PA), la lèvres d'étanchéité est un déchet usuel. Suivre les prescriptions du pays pay.

De plus amples renseignements sous: www.planet.ag

Mantenimiento: Revisar el funcionamiento cada 2 años (funcionamiento del botón de empuje, del deslizador del Planet y de su correcta bajada hasta el suelo). Si es necesario, limpiar suciedad y limpiar.

Reciclaje: separar los distintos componentes del Planet (aluminio, acero, PA) y reciclarlos. El labio de silicona es desecho residual. Sigue las instrucciones de su país.

Más información: www.planet.ag

Обслуживание: проверять каждые два года на работоспособность (кнопка, губа-манжета, ход) и загрязнение, при необходимости очищать. Не смазывать уплотняющую губу-манжету!

Утирование: разбирать уплотнитель по видам материалов (алюминий, сталь, пластик) и сдать в переработку. Губа-манжета относится к бытовому мусору. Принимайте, пожалуйста, во внимание основные предписания в Вашей стране. Больше сведений на: www.planet.ag

Soundproof → State: first of May 2010

Principle	Planet examines all drop-down seals for sound absorbing performance. Two methods are applied.												
Joint sound insulation	The first measures the joint sound insulation. But this method measures and evaluates only the drop-down seal according to DIN EN ISO 10140. This determines a basic value at a floor clearance of 7 mm. Our partner for these measurements is the ift in DE-Rosenheim.												
Element examination	<p>In addition to this we perform diverse sound protection measurements with complete doors according to DIN EN ISO 10140-3. The test stand corresponds to DIN EN ISO 10140-1, partner ift-Rosenheim.</p> <p>The corresponding test reports/approvals can be ordered at our company.</p> <p>In addition we have carried out countless element tests together with our customers around Europe and in overseas.</p>												
Definition of the sound level in dB (decibel)	<p>Corresponds to the acoustic pressure level and represents a logarithmic measure of the power of sound incident. It serves even to determine the sound protection in the field of the architectural acoustics. Examples for the acoustic pressure level adapted to the human ear dB (A).</p> <table> <tr> <td>– Quiet room in the night</td><td>approx. 15–25 dB (A)</td></tr> <tr> <td>– Quiet room during the day</td><td>approx. 30–35 dB (A)</td></tr> <tr> <td>– Normal speech</td><td>approx. 60 dB (A)</td></tr> <tr> <td>– Traffic noise</td><td>approx. 70–80 dB (A)</td></tr> <tr> <td>– Workshop noise</td><td>approx. 90–100 dB (A)</td></tr> <tr> <td>– Threshold of pain</td><td>approx. 120 dB (A)</td></tr> </table>	– Quiet room in the night	approx. 15–25 dB (A)	– Quiet room during the day	approx. 30–35 dB (A)	– Normal speech	approx. 60 dB (A)	– Traffic noise	approx. 70–80 dB (A)	– Workshop noise	approx. 90–100 dB (A)	– Threshold of pain	approx. 120 dB (A)
– Quiet room in the night	approx. 15–25 dB (A)												
– Quiet room during the day	approx. 30–35 dB (A)												
– Normal speech	approx. 60 dB (A)												
– Traffic noise	approx. 70–80 dB (A)												
– Workshop noise	approx. 90–100 dB (A)												
– Threshold of pain	approx. 120 dB (A)												
Evaluated sound insulation measure R_w	The measured R-curve (R = sound insulation measure) is compared with a standard curve which is moved against the measured curve until the deviation is situated in a defined range of tolerance. The value reading at 500 Hz of the standard curve amounts to the R_w -value as an individual indication.												
Transmission by an indirect path	R_w means a laboratory value (without indirect path transmission) opposite to the R'_w (construction value with indirect path transmission).												
Impact noise	<p>The impact noise has to be observed beside the airborne sound. This noise is often ignored at the planning of the noise insulation value. The impact noise is a noise transmission through the solid. One has especially to observe the floor. We recommend a separation of the floor base, a cut in, between the two rooms from $R_w \geq 30$ dB (A). The room separation by walls is also guaranteed in the floor. This seam can be bridged again by a threshold plate F or a floor separation sill of Planet.</p> <p>→ refer to the chapter Impact noise.</p>												
Test laboratory	<p>ift Rosenheim, DE-83026 Rosenheim, Germany</p> 												

Soundproof (continuation)

Sound protection requirements in Switzerland

	Recommendation according to SIA 181	R'_{w+C}
Appartment building	Corridor – living room	30 – 32 dB

Doors between classrooms or similar rooms and entrance halls	SK 2	32 dB	37 dB

Planet Sound Laboratory → State: first of May 2010

Principle	We offer a new and modern laboratory for the measuring of the airborne sound insulation of doors and door leaves on the test stand according to EN 20140-3.
Laboratory equipment	<ul style="list-style-type: none"> – the most modern laboratory equipment of the company Norsonic-Tippkemper – variable test ports for the sound measuring of door elements – wall openings of 1015 x 2005 up to 2700 x 2700 mm following to DIN 4172 – planned, measured and regularly checked by foreign people of the ift Rosenheim
Performances	<ul style="list-style-type: none"> – Orienting measuring of the airborne sound insulation of components in test stands according to EN 20140-3 – Evaluation of the sound insulation according to EN ISO 717-1 – Planet journal or Planet test report
For your	<ul style="list-style-type: none"> – New developments – Measurements for material selection – Measuring series – Supervision of quality and products – Preliminary tests → with extremely interesting conditions
But also	<p>by means of the ift Rosenheim in the sound laboratory at Planet:</p> <ul style="list-style-type: none"> – recognized test and evaluation (CE and building supervision) incl. ift test proof with cooperation of the ift Rosenheim as international accredited (DAP-PL-0808.99; BAY18) and European quoted authority (NB0757)

Certificate

Modern laboratory for the measuring of the airborne sound insulation of doors and door leaves on the test stand according to EN 20140-3.

Planet Sound Laboratory (continuation)

Technical Data Sheet

Designed as 'room in the room' the sound laboratory is acoustically disconnected from all the other parts of the building and thus fulfils the requirements according to EN ISO 140 (test stands without indirect path transmission resp. with suppressed sound indirect path effects). The separation joint between the rooms is 5 cm large.

The test rooms show the following clearances / clear widths:

– Studio:

Height 294 m, width 5,30 m, depth 6,43 m, resulting in a studio transmitter volume of 100 m³

– Reception room:

Height 2,78 m, width 4,82 m, depth 3,80–5,58 m (oblique), resulting in a studio transmitter volume of 62,8 m³. ZA door test opening is installed between the test rooms, dimension 2,7 x 2,7 m it can be reduced in size into screens by means of a flexible wall system.

Our performances:

- Informative measuring of the airborne sound insulation of components in test stands according to EN 20140-3
- Evaluation of the sound insulation according to EN ISO 717-1
- Planet protocol

Grundlage

Kooperationsvertrag „Vereinbarung über die Zusammenarbeit zur Durchführung von Prüfungen“, insbesondere die prüfverfahren-spezifischen Anforderungen lt. Anlagen 2.2

Einmessbericht Nr. 835 35336 vom 29. Juli 2008, Bericht 171 41857 vom 2.11.09, Bericht 11-001939 vom 20.7.2011, Bericht Nr. 17-001525-PR02 (PB-XXX-04-de-01) vom 10.10.2018

Zweck

Die Überwachung dient der Sicherstellung der Aufrechterhaltung der festgelegten Voraussetzungen zur Nutzung externer, firmeneigener Prüfmittel/Prüfstände für ift-Prüfungen.

Durchführung

Die Überwachung erfolgt gemäß o.g. Grundlagen am Standort und umfasst:

- die Kontrolle der Einhaltung der Vereinbarung
- ggf. die Einweisung neuer Mitarbeiter

Die Feststellungen und Einzelergebnisse werden dem Standort-Verantwortlichen erläutert und sind im Protokoll, das Bestandteil dieses Berichts ist, dokumentiert.

Änderungen

Änderungen an Prüfstand und beim Personal müssen dem ift unaufgefordert mitgeteilt werden.

Veröffentlichungshinweise

Das Deckblatt kann als Kurzfassung verwendet werden.

Inhalt

Der Bericht umfasst insgesamt 5 Seiten:

- Deckblatt
- Protokoll mit
- Überwachungsergebnissen
 - Bemerkungen/Maßnahmen

Planet Sound Laboratory according to EN 20 140-3

Further important details

Dimensions / clearance height rolling door:

- Width 2,9 m x height 2,55 m for the entry and to park the pickup

Entrance door of the sound laboratory:

- Width 2,63 m x height 2,53 m

Available tools and auxiliary devices:

- wooden blocks, width 1000 mm, height 750 mm
- Circular saw Bosch GKS 65, saw blade Ø 190 mm, depth of cut max. 65 mm
- Hand saw DeWalt DW 615, 900W, 8000-24000 1/min, mandrel 8 mm

– Bord:

- Several possibilities in the vicinity

Overnight stay in a hotel:

- Please ask for our hotel guide

Planet Sound Laboratory according to EN 20140-3 | Test stand: frame made of wood

Available frames

- Wooden frame with ZFM 966 x 1983 mm, fold: 25,5 x 15 mm, VX 7502 (241, 1435 mm), handle height 1050 mm of UK, catch lock punching 4 mm from the front, DIN left

Available frames

- Steel frame with ZFM 966×1983 mm, fold: 25,5×15 mm, VX 7612 (241, 1435 mm), handle height 1050 of UK, catch lock punching 4 mm from the front, DIN left

Impact noise → State: first of May 2010

Principle

Is a noise which expands in a solid. In a building. This noise is normally transmitted by walls and floors resp. by ceilings.

Example: a floor in a room oscillates because of the movements of persons (walking, running) and by machines but also by airborne sound (speech, music). These oscillations are transmitted again to the air in the rooms next-door or underneath and can be measured as an airborne sound.

To avoid the impact noise resp. the solid-borne sound in a building is a very complex task. Therefore, only the transmission of impact noise in the door area will be mentioned.

Recommendation

- We recommend a floor separation at a required door sound insulation from 30 dB.
- Please note that the sound insulation values measured in the sound laboratory normally cannot be reached on the building site without floor separation not either with a deducted measure.
- Please inform the persons involved in a building.

Examples of sound transmission

Sound and impact noise without floor separation. Carpets reduce the sound insulation of a door resp. the seal, ideal is a smooth and straight floor.

Sound and impact noise with floor separation. Reduce the sound transmission across the floor resp. avoid it by floor separation.

Sound and impact noise with floor separation. Drop-down seal with Planet F hollow flat rail.

Sound and impact noise with floor separation. Drop-down seal with Planet BT floor separation sill.

Fire resistant → State: first of May 2010

Principle

All of our seals of the execution sound-, smoke- and fire protection are convenient for fire protection elements. The corresponding guidelines and standards of the individual countries form the base. The most important test and standard is the DIN 4102-5, and latest the DIN 1634-1, for fire protection door elements in Germany and the EU.

The maximum allowable air gap of 15 mm for fire protection doors can be closed with all our seals.

Test method

In cooperation with the Materialprüfungsamt Nordrhein-Westfalen, MPA NRW, in DE-Dortmund we test our products according to DIN 4102 part 18, continuous function test, for the suitability in fire protection elements. Two fields are checked with it. The first is the lifetime test. This one requires 200 000 closing and opening cycles without troubles. During the new developments our seals perform several millions of movements. The second topic is the material selection of the drop-down seal. Non-combustible materials are prescribed and especially for the seal lips, it is the quality: self-extinguishing.

T30 up to T90

Products corresponding to DIN 4102 part 18 can be used for all fire protection elements from T30 up to T90. But every manufacturer is committed to test himself his element regarding the corresponding homologation.

Classes of fire resistance

Simplified the European classifications can be assigned to the fire resistance of components to the VKF classifications as follows:

Component	EN	VKF
load-bearing, room closing, heat insulated	REI	F
non load-bearing, room closing, heat insulated	EI	F, S, K
room closing, mobile, heat insulated	EI-C	T
Room closing EI 30-C, tight against smoke and flames	E	R

Example: the fire protection door T30 corresponds now to EI30-C resp. EI_{230-C}₂₀₀

Test partner

MPA NRW, Materialprüfungsamt Nordrhein-Westfalen, DE-44287 Dortmund, Germany

Smokeproof → State: first of May 2010

Principle	All of our seals in the execution sound- and smoke protection and sound-, smoke- and fire protection are convenient for the smoke protection. The guidelines and standards of the individual countries are the base for it. The most important test and standard is the DIN 18095 for Germany and the EU as well.
Test method	In cooperation with the Materialprüfungsamt Nordrhein-Westfalen, MPA NRW we test our products according to DIN 18095 18 for the suitability in smoke protection. Two fields are checked with it. The first is the lifetime test. This one requires 200 000 closing and opening cycles without troubles. During the new developments our seals perform several millions of movements. The second topic is the test 1:1 on the door test stand. The same temperature range of max. 200° C is applied and the same excess pressures and vacuums are tested as with complete smoke protection elements. The values we achieve are clearly situated below the maximum admissible leak rate of 20 m ³ for single leaf resp. 30 m ³ double leaf folding doors. You can ask for the relevant test approvals at our company
Smoke	Door designation <ul style="list-style-type: none">- ccording to DIN 18095 → RS 1 (single leaf)- According to DIN 18095 → RS 2 (double leaf)- According to EN 1634-3 → C5S₂₀₀ (designation according to the test standard → not according to the classification standard) C5 continuous function test class 5 with 200 000 movements Smoke leak test S ₂₀₀ at 200°C
Test partner	MPA NRW , Materialprüfungsamt Nordrhein-Westfalen, DE-44287 Dortmund, Germany

Escape route (emergency exit) → State: first of May 2010

European Standards for Locks of Escape Doors

Principle	<p>Our drop-down seals with the profile widths of 13 mm and 20 mm are convenient for this escape doors. This applies to single leaf and to double leaf / folding door situations as well.</p> <p>The use of the seals in the stationary door wing with a continuous locking bar, this means the execution with preparation of the driving bar with drilling $\varnothing 5 \times 13$ mm and drilling $\varnothing 10$ mm is feasible. But this requires tested and approved lock sets, e.g. BKS, BMH a.s.o.</p>
Locks for emergency DIN EN 179	<p>The lock of an emergency exit must guarantee that a door can manually be opened at any time within 1 second and with max. 70 N. A load of the door like in a panic situation is not assumed. This means: these doors are not exposed to public. The door-handle must be designed in a special shape to prevent any injury.</p>
Locks for panic situation DIN EN 1125	<p>This lock set consists of lock, handle of panic bar, possibly driving rod bar and counterpart interlocks; all components have to be checked and certified altogether. The panic lock must assure that the door can manually be opened at any time within 1 second with max. 80 N (at unloaded door) and max. 220 N (door loaded with 1000 N). These doors are exposed to public use and they have to guarantee the free passage for persons concerned in an emergency situation in panic or escape situation.</p>

Low energy building, passive building a.s.o. → State: first of May 2010

Basis	<p>It is common to all to define and to limit the primary energy resp. the yearly heat consumption of the buildings. The energy consumption in reference to square meters per year serves as the parameter.</p> <p>The MINERGIE® standard is a voluntary Swiss construction standard for the efficient application of energy and the large use of renewable energy at a simultaneous improvement of the quality of life.</p> <p>There are 5 requirements for residential buildings (new buildings):</p> <ol style="list-style-type: none">1. Primary requirement for the building wrapping<ul style="list-style-type: none">– heat requirement (Q_h) below 60% of the limiting value (H_g) of the SIA standard 380 / 12. Aeration system<ul style="list-style-type: none">– a monitored aeration is imperatively prescribed– a comfort aeration with heat recovery ist usefully3. Energy requirement for the room heat, hot-water, air renewal and air-conditioning<ul style="list-style-type: none">– new buildings: maximum 38 kWh / (m²a)4. Proof of the thermal comfort in summer<ul style="list-style-type: none">– no mid-summer temperatures may arise5. Costs<ul style="list-style-type: none">– a maximum of 10 % additional costs in comparison to conventional buildings
Low energy building	<p>a building which remains under the legal requirements of the energetic demand level. In Germany the energetic demand level describes the energy saving order EnEV. This results in a prescribed primary energy requirement (heating+hot-water) in relation to the degree of compactness (A/V), surface to volume of the building. This amounts to a:</p> <ul style="list-style-type: none">– Primary energy demand: approx. 120 kWh / (m²a)– Heat requirement: approx. 40–70 kWh / (m²a). <p>A monitored aeration is not imperatively prescribed.</p>
Passive building	<p>Further development of the low energy building in relation to the thermal protection and an airtight building wrapping. No classic heating available. The thermal cosiness is realized by additional heating resp. cooling of the fresh air. The mainly part of the heat consumption is covered by «passive sources», e.g. insolation, lost heat of technical appliances and persons. This amounts to a:</p> <ul style="list-style-type: none">– Primary energy demand: ≤ 120 kWh / (m²a) inkl. aller elektrischer Verbraucher– Heat requirement: ≤ 15 kWh / (m²a). <p>A monitored aeration installation is imperatively prescribed.</p>
MINERGIE® P	<p>Swiss variant of the passive building. With the ratio surface/energy reference surface = 1,1 it results a heat requirement: ≤ 10 kWh / (m²a). A monitored aeration installation is urgently prescribed.</p>
KfW 40	<p>named according to the German KfW Förderbank (bank for reconstruction)</p> <ul style="list-style-type: none">– Primary energy demand: ≤ 40 kWh / (m²a). <p>A monitored aeration installation is imperatively prescribed.</p>
KfW 60	<p>named according to the German KfW Förderbank (bank for reconstruction)</p> <ul style="list-style-type: none">– Primary energy demand: ≤ 60 kWh / (m²a). <p>A monitored aeration installation is imperatively prescribed.</p>

X-Liter building	Is defined by the heating oil demand. Mostly a 3 liter building and it corresponds therefore to a heat requirement of: \leq e.g. 3 litres heating oil (m^2a) corresponding to approx. $30 \text{ kWh} / (\text{m}^2\text{a})$.
EnEV	<p>Part of the German building laws (deutsches Baurecht) for the realization of the EC Directives regarding the total energy efficiency of buildings. The EnEV unites the balance of energy of the building installation technics (heating, hot-water and aeration, with the signification of the energy carrier and the building heat protection. The summer heat protection and the solar heat recovery have been considered.</p> <p>Depending on the compactness degree A/V (outer surface/volume) the EnEV limits the loss of transmission heat HT (lost of heat) of the building and the primary heat demand (energy demand for heating and hot-water and losses from the production of the energy carrier up to the distribution in the building as well).</p> <p>Valid since 2002, modified 2007, further modification 2009 (aggravation up to 30%).</p>
Austria	<p>Realization of the EC Directives covering the total energy efficiency of buildings on the national level since 2006 in the law of energy identification proof. The calculation basis are settled by the construction prescriptions of the Land. The directive OIB 6 forms the basis of it. Therein are treated the valuation and the significance of the demands of the building wrapping (protection, density and compactness), the heat requirement HWB, the heat energy demand (HEB + mechanical aeration and cooling + lighting) EEB and the total energy demand GEB with the various energy carriers. The building location is characerized by different zones. The summer heat protection has been taken into consideration.</p> <p>The energy identification proof for residential buildings (new buildings) has to reflect the following indications:</p> <ul style="list-style-type: none"> a) heat requirement (HWB) of the building and the comparison to reference values b) heating technics – energy demand of the building (HTEB), loss of energy at heat production and distribution c) Final energy demand of the building; <p>Valid for the new construction of residential building:</p> <ul style="list-style-type: none"> – heat requirement: max. $78 \text{ kWh}/(\text{m}^2\text{a})$ relative to the reference climate, valid until 31.12.09, max. $66,5 \text{ kWh} / (\text{m}^2\text{a})$ from 1.1.2010.

Development of construction standards

Low energy building, passive building a.s.o. (continuation)

Proofs

MINERGIE® verification: regarding the imperative aeration there are simplified proofs for the following 6 aeration systems:

1. comfort aeration with heat recovery
2. comfort aeration with heat pump
3. Waste air system with exterior air passages
4. Waste air system with heat pump
5. Single room comfort aeration
6. Automatic window aeration

Pertaining the aeration installations 1–4 the entire building is considered as one aeration unit and this means: the walls separating the individual rooms must allow an air passage between incoming and used air.

By now this is realized through air passages in the wall, mostly above the door or upside the door at shortened doors, greater air space on the bottom edge, or an air grill, or a section in the real door leaf.

The sound insulation between the individual living spaces is considerably reduced resp. prevented by these versions.

A new patented possibility to reduce the sound and to allow simultaneously an air passage and to stop the translucence is the floor seal from Planet.

Planet MinE (Minergie) a system including a floor seal and an air channel for the assembly in a standard door from a thickness of 40 mm and a sound insulation value of RST,W 23–27 dB according to the execution. Especially good sound insulation of above 30 dB of the human voice (base sound 250 dB female, male 125 dB) and an air passage of minimum 40 m³/h at a corresponding pressure/ vacuum. Typical applications exist on all doors of the living space.

- to the WC / Sanitary
- to the children's room
- to the bedroom
- to the living space
- to the corridor.

Barrier-free → State: 10.01.2017

Underpinnings

The multi-faceted nature of accessibility planning and construction is governed by various branches of law, such as social legislation or the planning and building laws as a component of public law. Of general significance though, but without any direct connection to planning and construction are:

- Globally

The UN Convention on the Rights of Persons with Disabilities:

«...to promote, protect and ensure the full and equal enjoyment of all human rights and fundamental freedoms by all persons with disabilities...» (Article 1, Convention on the Rights of Persons with Disabilities).

- Germany

The German Constitution, paragraph 3, clause 2:

Nobody shall be discriminated against because of their disability.

- Switzerland

The Federal Constitution of the Swiss Confederation, Art. 8, Equal rights:

1. All people are equal before the law.

2. Nobody shall be discriminated against on the grounds of their origin, race, gender, age, language, social position, lifestyle, personal or political convictions or physical, mental or psychological disabilities.

- Austria

Federal Constitutional Law, Art. 7:

All nationals are equal before the law. Privileges based upon birth, gender, estate, class or religion are excluded. Nobody shall be discriminated against because of their disability. The Republic (Federation, provinces and municipalities) commits itself to ensuring the equal treatment of disabled and non-disabled persons in all spheres of everyday life.

Realisation

The realisation of the planning and construction of accessible buildings is to be found in the building regulations and superior legislation. For example, in Germany there is the Equal Opportunities for Disabled Persons Act.

The gist is that:

Public buildings shall meet accessibility design norms and the recognised codes of practice.

Definition of accessibility

The principle of accessibility is still applied solely to disabled people as the target group. That is incomprehensible, especially since experts' opinions and reports throughout Germany and Europe repeatedly highlight that the provision of accessibility (DIN 18040, Construction of accessible buildings) is in the interests of all people and not just certain groups of persons with special needs. It is known that an accessible environment free of barriers is absolutely essential for about 10 % of the population, is necessary for about 30-40 % and is convenient for 100 %.

According to Germany's Model Building Code (MBO):

«Building structures are deemed barrier-free if they are accessible and can be used in the usual way without impediment by people with disabilities, essentially without outside help»

Additional costs

According to studies in Switzerland, the additional costs for barrier-free construction of smaller new buildings is roughly 1.5 – 4 % of the total building outlay. If the outlay for accessibility amounts to 20 % additional costs, exemption clauses come into effect. These exemption clauses are made use of particularly with older buildings.

Barrier-free (continuation)

Promotion

In Germany, anyone can ask the KfW development bank for a grant to improve accessibility, enterprise product 455.

[https://www.kfw.de/inlandsfoerderung/Privatpersonen/Bestandsimmobilie/F%C3%B6rderprodukte/Altersgerecht-Umbauen-Investitionszuschuss-\(455\)/](https://www.kfw.de/inlandsfoerderung/Privatpersonen/Bestandsimmobilie/F%C3%B6rderprodukte/Altersgerecht-Umbauen-Investitionszuschuss-(455)/)

Norms

The relevant norms that apply in Germany are part 1 (public buildings) and part 2 (private dwellings) of DIN 18040. Nevertheless, it has not been introduced, i.e. become legally valid, in all federal states.

The norm that applies in Switzerland is SIA 500 (SN 521500).

The applicable norms in Austria are Ö-Norm B 1600-1603.

These norms specify or regulate the following items (amongst others) in relation to doors:

- Door widths
- Room to move in front of the door
- Latch height
- Opening force
- Threshold height below doors and many other things

The general rule is always that: «Thresholds and stops should be avoided at the bottom edge of the door.»

Challenges with entrance doors

Entrance doors are subject to the European product standard EN14351-1. These doors must meet the requirements of the classification standard EN 12207/08/10 amongst others. Proof of air tightness as well as resistance to driving rain and deformation under wind load is obtained by testing to EN 1026/27 and 12211 standards.

According to the accessibility standards (DIN 18040/SIA 500/ ÖNORM B 1600-1603), bottom door stops and thresholds are not permissible. If they cannot be avoided for technical reasons, they must be no higher than 20 / 25 mm.

Up to now the requirements on entrance doors with regard to resistance to driving rain to meet the EN 14351 product standard have been resolvable only with buffer thresholds or very rarely with almost threshold-less designs, but with drainage channels.

Planet solutions

The Planet company has designed the Planet X3 entrance door drop-down seal. It is an easy-to-fit, low cost automatically lowering floor seal for entrance doors that meets all the entrance door requirements of the EN 14351-1 product standard as regards impenetrability to air and driving rain.

The Planet X3 allows threshold-free entrance doors that provide accessibility along with absolute impenetrability to driving rain.

Owing to their simplicity, the Planet X3 seal and its associated zero threshold are suitable for both new buildings and renovations, i.e. upgrading existing doors to a zero threshold.

Universal Design

Universal Design is an international design concept whereby products, equipment, environments and systems are designed so as to be usable by as many people as possible without further adaptation or specialisation. The design features are specified by seven principles.

With its zero threshold the Planet X3 fulfils the following principles:

Principle 1 prescribes equitable use by all people, regardless of their abilities.

→ A zero threshold presents no obstacle and can be used by all people.

Principle 2 facilitates use even by people with highly individual capabilities.

→ A zero threshold presents no obstacle and can be travelled over by anyone.

Principle 3 aims to facilitate simple and intuitive use.

→ A zero threshold is no longer perceived as a threshold.

Principle 6 calls for a low physical effort.

→ A zero threshold calls for no additional physical effort

By virtue of the Planet X3 and the zero threshold the principles of Universal Design are met too.

Planet air, wind and water testing facility → State: 21.11.2016

Policy	We offer you a modern testing facility for determining the joint permeability, driving rain resistance and wind stressing as well as the corresponding deflexion of doors and windows according to the testing standards of EN 14351-1.
Testing facility	<ul style="list-style-type: none">– Modern testing facility created by ift Rosenheim– Variable clamping surface in a width of 2000 mm and height up to 2300 mm– Regularly calibrated by ift Rosenheim
Services	<ul style="list-style-type: none">– Measurement of joint permeability, driving rain resistance and wind stressing according to the current testing standards for EN 14351-1– Classification according to the pertinent EN 12207 / 12208 / 12210 standards– Planet record of the measurements
For your	<ul style="list-style-type: none">– New developments– Preliminary tests → on highly attractive terms– Series of measurements– Quality- and product monitoring
But also	<p>By the ift Rosenheim at the Planet test facility:</p> <ul style="list-style-type: none">– Accredited testing and assessment (CE and building supervision) including an ift test certificate through cooperation with ift Rosenheim as an internationally accredited (DAP-PL-0808.99; BAY18) and European notified body (NB0757)

Certificate

Modern testing facility for measurement of joint permeability, driving rain resistance and wind stressing according to the testing standards for EN 14351-1

Engineering data sheet The air, wind and water test bed has a variable clamping surface. Width 2000 mm, Height 2300 mm.
Required clamping frames must be provided by the customer.

Our services:

- Orientating measurements in accordance with the testing standards for EN 14351-1 regarding air tightness, driving rain resistance and resistance to wind loads
- Planet record of measurements and classification

Further important data

Dimensions / Vertical clearance of roller door:

- Width 2.9 m x Height 2.55 m for entry and parking of utility van

Available tools and equipment:

- 3 wooden trestles, width 1000 mm, height 750 mm
- Bosch GKS 65 circular saw, 190 mm HM saw blade, max. 65 mm cutting depth
- DeWalt DW 615 portable router, 900W, 8000–24000 rpm, 8 mm collet

Dining options:

- Several restaurants within 5 to 15 minutes travel by car

Overnight stays:

- Request our list of hotels

Environmental Product Declarations (EPD)

Environmental Product Declaration (EPD)

Short version

Declaration Code: EPD-DB-8.1

Programme operator	ift Rosenheim GmbH Theodor Gietl Straße 7-9 D-83026 Rosenheim		
Practitioner of the LCA	ift Rosenheim GmbH Theodor Gietl Straße 7-9 D-83026 Rosenheim		
Declaration holder	Planet GDZ AG Neustadtstraße 2 8317 Tangelswangen		
Declaration code	EPD-DB-8.1		
Designation of declared product	Drop-down seals for doors		
Scope	Efficient drop-down seal for sound insulation, radiation protection, smoke control and fire resistant doors, and low energy and passive houses		
Basis	This EPD was prepared on the basis of EN ISO 14025:2011 and DIN EN 15804:2012+A1:2013. In addition, the "Allgemeiner Leitfaden zur Erstellung von Typ III Umweltproduktdeklarationen" (Guidance on preparing Type III Environmental Product Declarations) applies. The Declaration is based on the PCR Document "PCR Part A" PCR-A-0.2:2018 and "Seals/Gaskets" PCR-DI-2.0:2018.		
Validity	Publication date: 31.03.2020	Last revision: 31.03.2020	Next revision: 31.03.2025
	This verified Company Environmental Product Declaration (company EPD) applies solely to the specified products and is valid for a period of 5 years from the date of publication in accordance with DIN EN 15804.		
LCA basis	The LCA was prepared in accordance with DIN EN ISO 14040 and DIN EN ISO 14044. The base data includes both the data collected at the production site of Planet GDZ AG and the generic data derived from the "GaBi 9" database. LCA calculations were carried out for the included "cradle to gate life cycle with options" (cradle to gate with options) including all upstream processes (e.g. raw material extraction, etc.).		
Notes	The "Conditions and Guidance on the Use of ift Test Documents" apply. The declaration holder assumes full liability for the underlying data, certificates and verifications.

Planet quick fit

Time is money! We help you earn money!
And no trouble at all to fit!

With the **new generation** of roller-blind type finger protectors and cover profiles, we have paid special attention to quick and easy installation. Adjustment options have also been incorporated in the totally new design. The parts can also be easily removed and re-fitted many times for maintenance, re-adjustment and cleaning.

1. With the handy and practical **marking aid**, which is suitable for roller protectors and cover profiles, you can save much of your time or install protectors three times as fast!

* * *

2. With the new **Clip-on system** developed by Planet you'll no longer need two people to carry out installation.
→ **one-man installation!**

* * *

3. The profiles are installed without any screw heads being visible, whilst **installation and removal** is easily performed. No parts are damaged or need to be replaced while doing this.

* * *

4. If you wish to dispense with the four-handed assembly procedure for ever, make use of our **positioning aid** included in the delivery.

* * *

Clip from stainless steel (red-coloured).
With the **clip system** the protective profile can be very easily pushed on or removed without causing any damage.

And last but not least, with the new **installation box** from Planet, our wish is for carpenters and metal workers to have a "helpful elf" on hand (illustrated on right).

Planet selection table

Clip-on system

Roller protectors **FSR**

- **Closes off** the gap at the **secondary closing edge** on the **non-hinge side**
- Only **one housing shape** for all doors for a harmonious overall impression
- **Simple installation and removal**
(when re-adjusting or cleaning the doors, for example)
- For **new** or **existing doors**
- Housing profile and fabric available in **diverse colours**
- **Standard lengths (1925 and 2015)** or **made to measure**

Advantages and features of the roller protectors **FSR** from Planet

Hard-wearing synthetic fibre fabric:
B1 flame retardant – **the standard**
with Planet finger protection®, washable

Vertical adjustment for
 crease-free cloth

Threaded pin to secure
 the clip-on profile

Invisible screws

Horizontally adjustable
 with elongated holes

New developed clip-on system
 (also with option mounting profile LP1 for panic hardware)

**Planet roller protector
 FSR 5000 [Basic]**

Standard roller protector

**Planet roller protector
 FSR 6000 [Quick]**

With new developed clip-on system

**Planet roller protector
 FSR 7000 [Outdoor]**

With new developed clip-on system,
 specifically for external doors and wet areas,
 rust-free mechanism

Practical advantages of using the clip-on system from Planet

Roller protector **FSR 6000** [Quick] and **FSR 7000** [Outdoor]

Very quick and easy mounting and removal of the fabric for ...

... approval- or inspection stickers

To read inspection stickers or affix new one

... re-adjusting the door hinges

When adjustment is necessary, elongated holes allow simultaneous adjustment of roller protector

... re-aligning the fabric/ roller protector

For crease-free cloth

... access to the cable ducts

When working on the electrics / electronics

... adjusting the Planet seal

To check and adjust the Planet floor seal.

Clip system (stainless steel)

Cover profiles **FSA**

- **Closes off** the gap at the **secondary closing edge** on the **hinge side**
- **Hinge side protective profile** in addition to the roller protection on the non-hinge side
- **Installed much quicker with the Planet marking aid** – **you save time and money**
- Simple **installation and removal** (possible repeatedly)
- Aluminum profiles available in a **large range of colours**
- For **new** and **existing doors**
- **Standard lengths (1755 / 1900 / 1980)** or **cut to size**
- Suitable for almost any **door- / hinge systems**

Overview cover profiles FSA

The Planet cover profiles are available in four different lengths (1755, 1900, 1980, per metre made to measure). With the «made to measure» option we will supply the profiles in the exact fit. This means you won't have to cut the profiles to size on-site, so you'll always have the correct length of cover profile ready at hand. Alternatively, you can choose from the 1755 and 1900 (for 2 parts) or the 1980 (for 3 parts) and cut the profiles to size yourself. Our aluminum profiles are available in anodised or powder coated finishes. We can also offer custom anodised or RAL finishes. As the roller protectors the cover profiles are also available in the «quick mount» option.

1755 / 1900 mm
→ Self cut to size
for 2 parts

Pre-drilled for installation in the lower and middle region of the hinges. Profile 1755 incl. screws. Profile 1900 without drilling.

1980 mm
→ Self cut to size
for 3 parts

Pre-drilled for installation in the lower, middle and upper region of the hinges. Profile 1980 incl. screws.

per linear metre
→ cut to size

Cut to size and pre-drilled. For example, three profiles including screws.

Advantages and features of the cover profiles **FSA** from Planet

Cover profile FSA 8100 [U-Clip]

Quick fit with marking aid and concealed clip connection

Cover profile FSA 8200 [U]

Cover profile for rebated doors. Quick fit with marking aid.

Cover profile FSA 8300 [D]

Cover profile for flush doors

Cover profile FSA 8400 [P]

Suitable for all doors with universal hinges

Cover profile FSA 8500 [O]

Cover profile for flush doors

Practical advantages with the cover profile

FSA 8100 [U-Clip] from Planet

Mark out, fit clips and
just clip on the profile.

(Option: Adhesive kit U-Clip)

Stainless steel clips

With the **stainless steel clips**, the U-clip profile is very simple to position. The profiles can be non-destructively fitted and removed.

Quick fit

With the **marking aid** from Planet you save much of your time.

Door blocker FSH 9000

Planet door blocker FSH 9000

Activate by simply turning it

Effective and low-cost **finger protection** for the **main closing edge**

Door blocker: view from above

Application field

Like the roller protectors and cover profiles from Planet, the **Planet door blocker** is suitable for child daycare centres and schools as well as retirement and convalescent homes, doctor's surgeries and private environment.

Key features

- Screwless **fitting in 2 minutes, no drilling of the door leaf**, no screw holes left behind after dismantling
- Easy, self-explanatory operation
- Can be permanently enables or disabled
- Can be used for multiple purposes, for example unwanted closing of the door
- **Maintenance free** and long-lasting
- No evidence of use is left behind on doors and frames

Materials

Door types

- Suitable for DIN L and DIN R

Warning: The Planet Door blocker FSH 9000 is not suitable for smoke and fire doors!

Fulfilment of the statutory regulations at power-operated doors with Planet finger protection®

Safeguarding of **power-operated swing doors** according to **DIN EN 16005** with Planet finger protection®

The European standard **DIN EN 16005** ensures the safe use of power-operated doors, so-called automatic doors.

§ 4.6.3.4 | Danger points at side closing edges between leaf and frame

Danger points between leaf and frame, which are a hazard for crushing fingers, must be avoided constructionally or by an appropriate safety device or by securing through technical protective measures.

§

Planet finger protection® is ideally suited to fulfil this safety standard and can be used in new buildings or retrofitted to existing ones! Automatic doors must be safeguarded up to a height of 2 metres above the floor.

Remark

All CEN members (such as Germany, Austria, Switzerland, France, Italy, Spain and Great Britain) have to adopt European norms unaltered into their national body of standards.

Planet finger protection® for fire doors

Planet finger protection® is also suitable for fire doors

The main components of Planet finger protection products are aluminium, spring steel and a difficult to ignite synthetic fibre fabric (compliant to B1*) and are basically suitable for use on fire and smoke control doors.

The product licence holder/door manufacturer undertakes to have the changes registered in the general building inspectorate approval (abZ). In Germany an abZ can be granted solely by applying to the German Institute for Civil Engineering (DIBt). Planet GDZ AG will of course advise

and lend its support to the applicant during the change process.

Further information can be found at: www.planet-fingerschutz.ag

* Fire resistance class B1 denotes building materials and products that are difficult to ignite according to the fire prevention standard DIN 4102-1 applicable in Germany. DIN 4102-1 defines materials as within fire resistance class B1 if a fire extinguishes by itself when its source is removed.

Fulfilment of the statutory provisions for doors in child daycare centres with Planet finger protection®

Fulfilment of German H&S regulation **DGUV** No. 102-002, for child daycare centres

This regulation prescribes the safeguarding of shearing points at doors in child daycare centres:

§ 3 | Shearing points at the secondary closing edges of doors must be avoided

Suitable solutions are, for example

- Appropriate door constructions
- Protective profiles
- Roller protectors

§

In child daycare centres too, Planet finger protection® is the right choice to safeguard children's hands while fulfilling the statutory requirements at the same time.

The situation in Switzerland

The Swiss Federal Office for Accident Prevention (bfu) also recognises the same danger points with doors. This is what the bfu states in its specialist brochure: Crushing points at the secondary closing edges of swing doors (opening or hinge side) can be dangerous especially to younger children. These crushing points should therefore be well shielded in kindergartens, child daycare centres and elementary school buildings.

Short Version

Declaration Code: EPD-FS-8.0

Programme operator	ift Rosenheim GmbH Theodor Gietl Straße 7-9 D-83026 Rosenheim		
Practitioner of the LCA	ift Rosenheim GmbH Theodor Gietl Straße 7-9 D-83026 Rosenheim		
Declaration holder	Planet GDZ AG Neustadtstraße 2 8317 Tangelswangen		
Declaration code	EPD-FS-8.0		
Designation of declared product	Finger protection FSR 5000, 6000, 7000		
Scope	Planet finger protection closes off the gap at the secondary closing edge on the non-hinge side		
Basis	This EPD was prepared on the basis of EN ISO 14025:2011 and DIN EN 15804:2012+A1:2013. In addition, the "Allgemeiner Leitfaden zur Erstellung von Typ III Umweltproduktdeklarationen" (Guidance on preparing Type III Environmental Product Declarations) applies. The Declaration is based on the PCR documents "PCR Part A" PCR-A-0.2:2018 and "Accessories for windows and doors" PCR-ZFT-1.0:2020.		
Validity	Publication date: 31.03.2020	Last revision: 31.03.2020	Next revision: 31.03.2025
	This verified Company Environmental Product Declaration (company EPD) applies solely to the specified products and is valid for a period of 5 years from the date of publication in accordance with DIN EN 15804.		
LCA basis	The LCA was prepared in accordance with DIN EN ISO 14040 and DIN EN ISO 14044. The base data includes both the data collected at the production site of Planet GDZ AG and the generic data derived from the "GaBi 9" database. LCA calculations were carried out for the included "cradle to gate life cycle with options" (cradle to gate with options) including all upstream processes (e.g. raw material extraction, etc.).		
Notes	The "Conditions and Guidance on the Use of ift Test Documents" apply. The declaration holder assumes full liability for the underlying data, certificates and verifications.		
 Christian Kehrer Head of ift Certification and Surveillance Body		 Dr. Torsten Mielecke Chairman of Expert Committee ift - EPD and PCR	 Florian Stich Independent Verifier
